

Current Status of our 90si Async Development Program

A lot has happened since last we updated you on the progress of our Async Development program. We continue to make excellent progress and are nearing completion of the development work. The biggest happening, however, is that the Government has decided to take an active role in this transition from Synchronous secure faxing to Asynchronous secure faxing.

The Government has tasked the Joint Interoperability Test Command (JITC) in Fort Huachuca, AZ with immediately creating an Asynchronous Secure Fax Test Bed to insure interoperability between all Async secure faxes and the primary crypto devices. We have agreed to participate.

We plan to provide JITC with our new Async capable 90si's for interoperability testing within the next few weeks. As soon as the results are published, we will send out another e-mail pointing you towards the results. We are absolutely committed to achieving flawless Async interoperability before we release the new 90si.

Do to our desire to participate in the JITC testing, we now estimate a late September release for the new async capable 90si.

Additional Notes

REGISTER FOR YOUR FREE UPGRADE: For those who have purchased a 90si since 1 NOV 2008, please remember to Register for your FREE async upgrade here:

<http://www.gwfs.com/Header/AsyncUpgrades/FreeUpgradeRequest.html>

DETERMINE YOUR COST: Look up your serial number here to find out the cost to upgrade (units shipped since 1 NOV 2006). All older 90si's qualify for a discounted trade-in. See part number 90si-TI at the bottom of this web page for more information:

<http://www.gwfs.com/Header/AsyncUpgrades/PriceChart.html>

PRE ORDER NOW: We continue to accept pre-orders for upgrades and trade-ins. Place your order now to insure prompt delivery following the release of the new async capable 90si hardware. You will find price and ordering info here: <http://www.gwfs.com/Header/order.html>
